**SEMICON<sup>®</sup>**  
*Europa2016*

**The SATT network and Linksiium organize on Wednesday, October 26 2016 in Grenoble the Technomarket event in partnership with Semicon Europa, the Largest Microelectronics Event in Europe.**

**When most promising technologies from SATT meet world-class leaders**

TechnoMarket is an event created by the SATT network promote innovative technologies from public research. It's a market place between SATTs and companies willing to innovate thanks to technology transfer.

The technologies showcased will be selected by an expert committee, composed of innovation executives, and key decision-makers of international industry leaders. The experts will select the most promising technologies to be presented at pitch sessions and posters exhibition. All technologies will also be presented on the Technomarket website.

Registered technologies must be part of the following categories:

Materials for semiconductors and electronics, including flexible materials
Equipment for electronics manufacturing
Micro & nanotechnologies
Electronics for medtech
Electronics for automotive
Electronics for cleantech
IoT

Deadline for applications submission: **13<sup>th</sup> July 2016**

The application form must be returned to the following address: [remi.lefebvre@satt.fr](mailto:remi.lefebvre@satt.fr)

Results will be announced on **September 7<sup>th</sup> 2016**

## **The Meeting of unveil innovative technologies to industry key people**

TechnoMarket enhances SATT's technologies and creates new exchange opportunities. This first Technomarket in Semicon Grenoble is a worldwide innovation for Semicon Tradeshows organization.

2 possibilities of interaction:

- Promotion of SATT's technologies through pitch sessions and posters exhibition
- One to on BtoB appointments. Your registration includes the access to the business meeting platform.

## **Targeted audience**

5,800 engineers, executives, and key decision-makers will attend SEMICON. 70% of visitors are involved in buying and investment decisions.

Industrial purchasers, SME managers and project managers will attend pitch sessions in order to discover innovative technologies and meet business developers and project promoters.

## **SEMICON Europa — Focus on Current Industry Needs**

It is the premier European showcase for business and exploration in areas like Semiconductors, LEDs, MEMS, printed/organic/flexible/hybrid electronics, MedTech, Automotive, Imaging, Design, SMART Manufacturing, Materials, Power Electronics, and Technologies for the IoT.

The SEMICON Europa technology and business programs address the critical issues and challenges facing the microelectronics industries and provide the information, education, and guidance that needed to move your innovations and products to market.

SEMICON Europa is collocated with IoT Planet, an International trade show offering visitors the unique opportunity to visit and meet the full electronic value chain, from core technology to software, final applications and connected objects.

## More about Semi

SEMI is the global industry association serving the manufacturing supply chain for the micro- and nano-electronics industries.

The industries, companies, and people SEMI represents are the architects of the electronics revolution. SEMI members are responsible for the innovations and technologies that enable smarter, faster, more powerful, and more affordable electronic products and devices that bring the power of the digital age to more people every day.

For more than 40 years, SEMI has served its members and the industries it represents through programs, initiatives, and actions designed to advance business and market growth worldwide.

SEMI facilitates the development and growth of our industries and manufacturing regions by organizing regional trade events (expositions), trade missions, and conferences; by engaging local and national governments and policy makers; through fostering collaboration; by conducting industry research and reporting market data; and by supporting other initiatives that encourage investment, trade, and technology innovation.

In addition to supporting access to regional markets, SEMI helps its members explore diversified business opportunities and contributes to the growth and advance of emerging and adjacent technology markets.
